- ◆ Glaucoma

Botulinum Toxin

More than 20 years of experience with BOTOX® including the treatment of benign essential blepharospasm, hemifacial spasm, chronic headaches and strabismus.

BOTOX® Cosmetic also available.

Where We Are

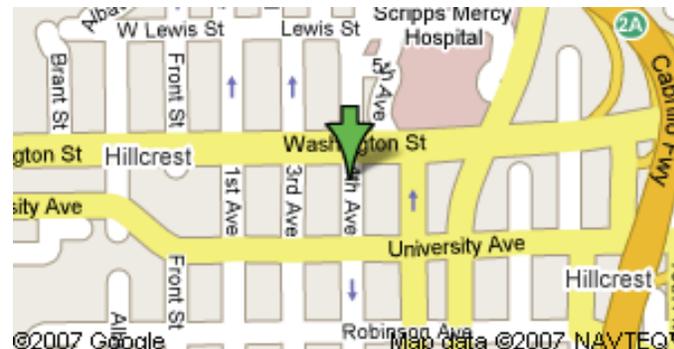

My office is conveniently located in the Hillcrest area of San Diego. Free valet parking is available in our building, so there is no need to try to find street parking or to park in one of the many pay lots in the area. Just pull into the second driveway and give your keys to the attendant. My staff will validate your ticket. If you arrive before the attendant gets there in the morning, just park in the garage and come on up to the office.

Driving Directions

From Hwy 163 southbound: take the Washington Street west exit. Turn left on 4th Avenue. The office is the first building on the left.

From I-5 northbound or southbound: take the Washington Street exit east. Go 1.25 miles and turn right on 4th Avenue. The office is the first building on the left.

Pull into the second driveway.

NMCSO, 2000-2004.

Clinical Instructor in Surgery, Uniformed Services
University of the Health Sciences

Author: two textbooks on visual field testing

What To Expect

Neuro-ophthalmic evaluations are frequently complex and extended. You can expect to spend several hours in the office and to have your eyes dilated as part of the examination. If you are uncomfortable driving while your eyes are dilated, you may want to arrange to have a family member or friend accompany you to drive you home after the appointment.

What To Bring

- ✓ An extensive medical history will be obtained as part of the evaluation; please review and complete the enclosed Medical Review of Systems & Past Medical History form.
- ✓ Be sure to bring a list of your current medications. If your condition has been present for a long time, try to bring a list of past medications and the approximate dates they were taken.
- ✓ Many patients referred to my practice will have had tests performed before they arrive. Please try to obtain copies of the results of any testing you have had done for your condition. I will need to look at any scans you had done; you can call the imaging facility where they were performed and request that the scans be copied to a compact disk (CD) for you to pick up before your appointment. Please be sure to get the report as well.

Insurance

Please be aware that I am not a network provider for all medical insurance benefit plans. If you are a member of an HMO, an authorization is required and should have been initiated by the referring doctor. If you have a PPO or a POS plan you should call the customer service number for your plan, let the service representative know you have been referred to me and ask for a breakdown of your benefits for your appointment with me; typically this number is found on the back side of the insurance card. If you have any questions concerning your appointment, feel free to call my office.

No Show Policy

If you are unable to keep your appointment, please call and let my office know at least forty-eight hours ahead of time. For patients who fail to notify my office when they cannot keep an appointment, I require a \$100.00 deposit before I will reschedule. The deposit will be returned at the time you keep the rescheduled appointment. If you fail to keep the appointment, the deposit will not be returned.
